

Stimulating Towards Perfection – Meeting the Learning Needs of Students through Effective Teaching

Mallesha.G. Assistant Professor, Department of Economics, Government First Grade College, Gundlupet, Chamarajanagar District – 571111, Karnataka State

Abstract: Effective teaching is a professional mechanism which needs efficacy to deliver. Not all teachers are proficient to teach effectively. Keeping & retaining the students' interest in classroom is a very serious issue, as today's students are very smart & intelligent. With innumerable learning resources easily available in their fingertips, they expect less teaching efforts from teachers. Whether a new teacher or an experienced one, certain new techniques to motivate students & encourage them to show up their full potential is needed. Meeting learning needs of today's students calls for adoption of inventive & resourceful methods in teaching. This paper discusses the mechanisms needed for a teacher towards effectual teaching.

Key words: Effective Teaching, Meeting Learning Needs, Stimulating Students, Innovative Mechanisms of Teaching.

Introduction: Teaching is a complex, multifaceted activity, often requiring teachers to manage multiple tasks and goals simultaneously and flexibly. Several principles can make teaching both more effective and more efficient, by helping student learning and minimize the need for revising materials, content, and policies. a teacher requires commitment in time and effort & redesigning of his teaching methodologies. There are certain methods which can motivate the student for better learning

Creating a sense of imagination – Students can be motivated to imagine new things in classroom teachers should make their students to think ahead of classroom activity & motivate them to come prepared for such activity.

Defining objectives of learning - Teachers should define objectives of learning before they start their classes. Teachers should make their students understand

the very objectives of their learning. This helps to build a supportive environment

1. **Create a friendly atmosphere -** Teachers should create a friendly atmosphere it should be safe threat free environment

Incorporation of practical teaching - Students can be motivated to learn even through field trips. campus visits , senior classroom visits, special lectures , other college visits , student exchange program , cultural competition in other colleges seminars, intra college visits , library visits etc

Innovative teaching - students always seek innovative teachings hence a teacher can motivate the student with practical works. Teachers can take students to library & provide awareness about their class books extra reading materials. Providing hands on experience to students will support their learning.
