

## A New Hypothetical Model of Cosmology

Gangadhara Rao Irlapati, HNo-5-30-4/1, Saibaba Nagar, IDA Jeedimetla, Hyderabad, India

**Abstract:** In this paper the author have been taken similarities of internal structure & properties between the Geo-Universe & Atomic-Universe to propose. The similarities of external structure & properties between the Atomic Universe and Energy-Universe are taken to propose that the entire universe in ascending and descending order of creation is having similar external structure and properties.

**Key words:** Atomic-Universe, external structure Geo-Universe

### Introduction

The cosmos is made up of universes in infinite number, having similar structure and properties, embedded one in each other and extended in ascending and descending order. To explain and justify this model, there are three universes so far known to us (a) Geo-Universe (b) Atomic-Universe (c) Energy-Universe. These three are having similar structure and properties, embedded one in each other and extended in ascending and descending order. Of these three, we known some extent about the internal structure and properties of the Geo-Universe but we do not known its external structure. We know some extent about the external structure and properties of the Energy-Universe but we do not know its internal structure. Between of these three universes, we came to know a large extent about the internal & external structure and properties of the Atomic-Universe. Hence, I have taken the similarities of internal structure & properties between the Geo-Universe & Atomic-Universe to propose that all the universes in

ascending and descending order of the creation are having similar internal structure and properties. The similarities of external structure & properties between the Atomic Universe and Energy-Universe are taken to propose that the entire universe in ascending and descending order of creation is having similar external structure and properties. And the manner in which of these three universes i.e., embedded one in each other, extended in ascending and descending order to propose that all the universes in ascending and descending order of the creation are embedded one in each other and extended in ascending and descending order.

### Similar external structure & properties

According to the model, all the universes in ascending and descending order of the creation are having similar external structure and properties. To justify this, I have taken many similarities between the atom and photon.

ATOMIC-UNIVERSE	ENERGY-UNIVERSE
The atom appearing in several forms such as Hydrogen to uranium etc., being due to the Internal structure having different atomic particles at various numbers	The particle "Photon" related to energy appearing in several forms such as radio waves, gamma rays, violet rays etc being may be probably due to the internal structure having different particles at various numbers
The atom exhibiting several physical and chemical Properties such as weight, colour, taste, hardness etc being due to the internal structure having different particles at various number	The particle "photon" related to energy exhibiting properties such as wave length, colour, temperature etc being may be Probably due to the internal structure having different particles at various number.

**Similar internal structure & properties**

According to the model, all the universes in ascending and descending order of the creation are having similar internal structure and properties. To explain and justify this, I have taken many similarities between the atomic-universe and Geo-Universe.

ATOMIC-UNIVERSE	GEO-UNIVERSE
Various atomic particles at different sizes in several numbers are present in the atom.	Various astronomical objects at different sizes in several numbers are present in the Geo- Universe
These atomic particles having three types of charges at negative, positive and neutral states are present in the atom	These astronomical objects having three type of charges at positive, negative and neutral states are present in the Geo-Universe
Positively charged protons are present in the nucleus	Stars built by atoms having positive charged nucleus are present in centre of the Geo-Universe
Neutrons at neutral state are present in the Nucleus	Planets at neutral state are present in Centre of the Geo-Universe
Negatively charged electrons are present at large distance of the atomic nucleus in the atom	There is a concept that anti-matter cosmic bodies built by atoms having negatively charged nucleus are present at large distance of the Geo-Universe
Additional neutrons called isotopes are present	Additional planets called satellites around the planets are present.
Radiation emitting from the atom	Cosmic rays emitting from the Geo-Universe
There is a property of nuclear fission is in the atom	There is a property of super Nova is in the Geo- Universe

### Descending order of creation

The Geo-Universe that means the Universe seen around our earth is having magnificent structure and properties such as galaxies, stars and planets and some planets such as earth having continents, countries, oceans, trees, animals, Cyclones, human beings etc. Such Geo-Universe being built by Universes of its descending order of creation that means atoms.

Atomic-Universe that means the atom present in several forms from hydrogen to uranium etc is another universe having magnificent structure and properties such as electrons, protons, neutrons, etc., and continents, countries, oceans, cyclones, trees, animals, human beings may be present on some neutrons having suitable conditions exactly similar to the earth planet resembling in the Geo-Universe. Such atomic Universe being built by universes of its descending order of creation that means energy particle 'photons'.

The Energy-Universe that means the particle "photon" related to energy present in several forms of electromagnetic radiation is also another universe having magnificent structure and properties resembling to Geo-Universe and atom. Such Energy-Universe may also being built by Universes of its descending order of creation that is not yet known to us.

Thus the descending order of creation continuous infinitely.

### Ascending order of creation

The Energy-universe that means the particle related to energy "photon" having magnificent structure and properties is being as a primary syntactic unit in the universe of its ascending order

of creation that means atom. All components in the atom are built by these "photons" in infinite number. Such each and every energy particle "photon" is basis to an infinite descending order of creation.

The Atomic—Universe that means the "Atom" having magnificent structure and properties is being as a primary syntactic unit in the universe of its ascending order of creation that means in our Geo-Universe. All components in the Geo-Universe such as stars, planets etc., are built by these atoms in infinite number. Such each and every atom is basis to an infinite descending order of creation.

The Geo-Universe that means the "Universe" seen around our earth having magnificent structure and properties is being as a primary syntactic unit in the universe of its ascending order of creation that is not yet known to us. All components in that Universe are built by these Geo-Universes in infinite number. Such each and every Geo-Universe in that ascending creation is basis to an infinite descending order of creation.

Thus the ascending order of creation continuous infinite.

### Cosmic-environments

The fill of structure and characteristics in the universe of the cosmos proposed as **cosmic environments**. For example the fill of structure and characteristics like galaxies, stars, planets etc in the Geo-Universe proposed as **Geo-Environment**, the fill of structure and characteristics like proton, neutrons and electrons etc in the Atomic-Universe proposed as **Atomic-Environment** and the fill of structure and characteristics in the Energy-Universe that means in the

photon that is not yet known proposed as **Energy-Environment**.

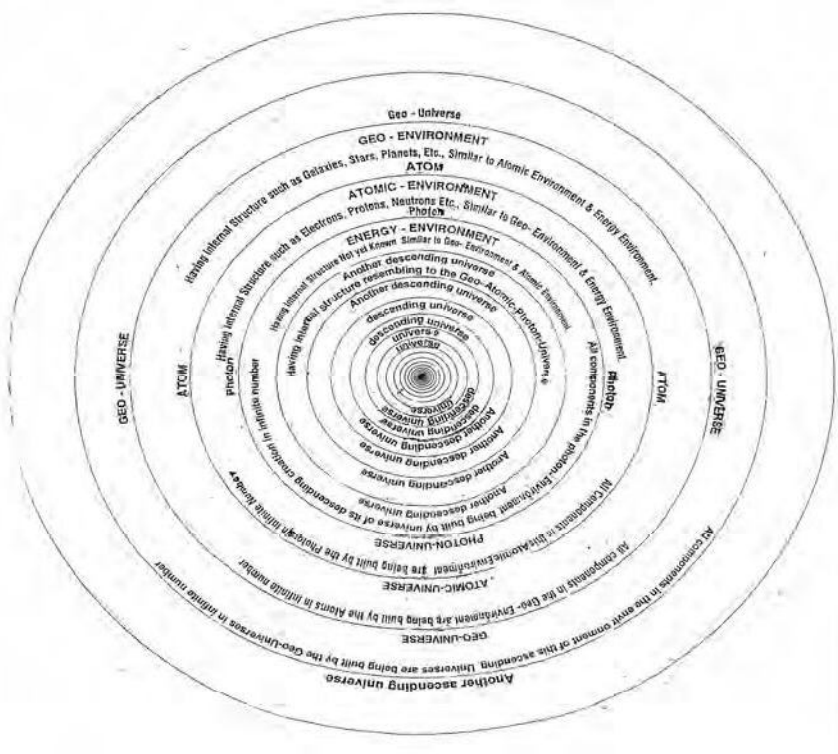

**Space Weather:** The fill of structure and characteristics like galaxies, Stars, Planets and their orbits and other physical forces etc that surrounds in the universe proposed as **space atmosphere**, the state of galaxies, stars, planets, nebulas. Pulsars etc at a particular region over a long period of time proposed as **space-climate**, the state of characteristics of space- climate like solar wind flares, asteroids etc at a particular region during a short period of time proposed as **space-weather**.

**Space Regions:** The state of space atmosphere being in still proposed as **"Inactive Space Region"**, the state of space atmosphere being in active proposed as **"Active Space Region"** The region of space atmosphere in which the

celestial bodies are more widespread areas proposed as "Space High Pressure Area", the less widespread areas proposed as " Space Low Pressure Area".

**Space Low Pressure Systems**

Some space times, happens variation of differences of pressure in the space-climate, At such a juncture, the celestial bodies and other space dust present in the space high pressure area will try to occupy the space low pressure area all at once. In this attempt, they will whirl around the space low pressure area. The centre of space low pressure area itself is the black-hole and the circular whirling celestial bodies & other space dust etc caused by the space low pressure area proposed as Galaxy.

Atom is gigantic Universe having structure and properties exactly similar to the structure and properties resembling our Geo-Universé and Energy particle. Just as there are stars, planets, galaxies and life on the earth etc. present in the Geo-Universé, in the same way exactly similar stars, planets, galaxies and life on neutrons etc. may be present in the form of electrons, protons and neutrons in the atom.

Energy particle has internal structure and having three kinds of basic elements proposed and named as Positive energies (PEONS) Negative energies (NEONS) and Neutral energies (NEUTONS) it is also another universe named as Energy-Universé having structure and properties exactly similar to the structure and properties resembling our Geo-Universé and Atomic-Universé.
